

## **Genuine Dermaroller™ Home Meso-rejuvenation treatment:** Transdermal skincare delivery for dramatically younger-looking skin

The **Home Meso-rejuvenation Genuine Dermaroller™** is the perfect addition to a high quality anti-ageing skincare regime. Each **Genuine Dermaroller™ Meso-rejuvenation device** contains 192 precision micro-medical skin-needles which, when rolled across the skin, stimulate the epidermis and allow your preferred anti-ageing skincare products to penetrate deeper into your skin, in some cases by over 1000%, thus greatly improving their efficacy.

Every needle on the **Home Meso-rejuvenation Genuine Dermaroller™** penetrates the skin to a maximum depth of 0.20mm, penetrating into the epidermis but without causing any physiological trauma to the skin. The needles are not long enough to reach the nerve sensors in the dermis, meaning that it's also pain-free. Used in the evening, two to three times a week, the **Home Meso-rejuvenation Genuine Dermaroller™** will help to dramatically improve the appearance of your skin.

As well as improving the efficacy of your anti-ageing skincare products, with continued use the stimulation of the skin's cells will also result in a faster renewal cycle of the epidermis, thereby increasing the thickness of the uppermost layer of the epidermis by 30%, leaving your skin looking plumper and younger and with a healthy glow.

After cleansing the skin thoroughly, apply your chosen anti-ageing serum, the **Genuine Dermaroller™** lipo-peptide collagen booster is specifically formulated for this task. Using gentle pressure, roll the **Home Meso-rejuvenation Genuine Dermaroller™** four times over each area in each direction: vertically, horizontally and in both diagonals, taking care around the delicate eye area.

The **Genuine Dermaroller™ Home Meso-rejuvenation device** is available from medical aesthetic practitioners and authorised **Dermaroller™** clinics and should be used under their care. The device comes from the home of the **Genuine Dermaroller™** medical devices, which are used by aesthetic practitioners during **Genuine Dermaroller™ Therapy™**, the clinical procedure which uses micro-medical skin-needles on the skin to regenerate collagen production. The **Genuine Dermaroller™ Home Meso-rejuvenation device** is available nationwide from £115.
